DR. MAE JEMISON

FIRST AFRICAN-AMERICAN WOMAN IN SPACE

Dr. Mae Jemison is an American icon, the first African American woman in space, entrepreneur and advocate for science education at all levels. College and Universities hosting STEM events praise Dr. Jemison as the perfect speaker to bring their event to an apex.

Cities and municipal regions working in partnership with tech and engineering businesses have invited Dr. Jemison to speak at their STEM events to draw attention to STEM careers, and to attract and develop talent. Dr. Jemison inspires her audiences as a living example of the literal heights STEM studies can take a dreamer and worker.
